Rene,

The short answer is no, and I apologize for not sending out an e-mail earlier. The only person I heard back from was Jean.

Because of travel schedules etc., the DEQ team has not completed its review and we will not be in a position to meet this week. Next week is a short week because of Thanksgiving. Lets plan on a tentative meeting the week of November 28th. I am assuming that folks will want to discuss the work plan, but we may not have to meet. For anyone that wants to participate in this discussion, please let me know your availability the week of 11/28.

Thanks Matt

Matt,

I just got to this message. Are these dates still on the running? I have not even looked at the document yet. Is this related to the Rhone Poulenc sampling which you had mentioned in another message?

Is it related to the work that we had discussed with Sean and the tar removal?

FW: Draft Gasco/Siltronic
Offshore Groundwater Field
Sampling Approach

Below is a link to the draft Gasco/Siltronic Offshore Groundwater Field Sampling Approach which I sent out earlier. I would like to receive Gov't team comments by November 18th. I also expect that there may be a need to internally meet to discuss the draft work plan. As place holders, I would propose 11/17 either am or pm, 11/21 pm and 11/22.

Please let me know,

Matt

Matt -

The above referenced document can be downloaded by clicking on the link below. Some users will occasionally have trouble downloading from this site, please let me know if this is the case. We are also sending you a CD in the mail, just in case.

Also, note there is a recent deliverable to EPA regarding the tar body removal action on this site. This is currently under review by EPA and any reviewing or commenting on that document should be coordinated through Sean Sheldrake. Thanks.

Carl
